Innovium Investment - RxRite® Announces Strategic Partnership with HealthRamp

Toronto ... Innovium Capital Corp. reports that one of its investments, RxRite.com Inc., announced a partnership with HealthRamp, a wholly owned subsidiary of Ramp Corporation (AMEX:RCO), to offer a HealthRamp CarePoint™ branded electronic prescribing solution on the BlackBerry® wireless platform.

The partnership entails RxRite developing a version of CarePoint for BlackBerry devices utilizing HealthRamp's point-of-care technology architecture as the foundation. RxRite has been developing software applications for the BlackBerry wireless platform since 1999 and recently became a BlackBerry Independent Software Vendor (ISV) Alliance member. The version of CarePoint for the BlackBerry will have all of the electronic prescribing features and benefits currently exclusive to CarePoint, including prescription drug coverage information, patient medication history, warnings to indicate potential adverse drug events and the secure transmission of a prescription to the patient's pharmacy.

"RxRite has tremendous experience and proficiency in developing clinical solutions for the BlackBerry. RxRite's technologies will ensure that the BlackBerry version of CarePoint is an out-of-the-box, cradle-free, electronic prescribing solution available for BlackBerry devices," stated Andrew Brown, Ramp CEO and President. "By adding the BlackBerry to our arsenal of support devices, we expect to significantly increase our opportunities for physician adoption and technology partnerships," concluded Brown.

"We are delighted to have access to HealthRamp's RxHub and SureScripts certified point-of-care infrastructures which are collocated in an IBM HIPAA compliant facility and capable of supporting over 25,000 concurrent users," said Rodney Dobson, President and CEO of RxRite. "HealthRamp's foundational technology, which comes complete with sophisticated practice management integration, permits us to leverage our BlackBerry development expertise and deliver a superior electronic prescribing solution worthy of the HealthRamp CarePoint brand," concluded Dobson.

About RxRite

RxRite was founded in 1999 and produces affordable, easy-to-use, software solutions that improve the delivery of healthcare and physician effectiveness. RxRite® point-of-care e-Prescribing technology provides physicians, pharmacies, payers and PBMs (Pharmacy Benefit Managers) with the ability to communicate effectively for the safe, secure, creation, transmission, and processing of electronic prescriptions. RxRite improves patient care by solving communications problems between healthcare providers, saving them time and money, and reducing their overall costs. RxRite's proprietary real-time wireless handheld and web-based applications can act as a stand-alone system or may be integrated with electronic medical record (EMR) and practice management systems. RxRite also operates an online patient-physician communication platform. For more information please email info@rxrite.com, visit www.rxrite.com or call 877-427-2763.

About Ramp Corporation

Ramp Corporation, through its wholly owned HealthRamp subsidiary, develops and markets the CareGiver and CarePoint suite of technologies. CareGiver enables long term care facility staff to easily place orders for drugs, treatments and supplies from a wireless handheld PDA or desktop web browser. CarePoint enables electronic prescribing, lab orders and results, Internet-based communication, data integration and transaction processing over a handheld device or browser, at the point-of-care. HealthRamp's products enable communication of value-added healthcare information among physician offices, pharmacies, hospitals, pharmacy benefit managers, health management organizations, pharmaceutical companies and health insurance companies. Additional information about Ramp can be found at www.Ramp.com.
